

# SKOOKUMCHUCK (Sechelt Rapids) BEST VIEWING TIMES

Skookumchuck means “Strong Water.” Tidewater, forced through Skookumchuck Narrows, forms the Sechelt Rapids. The difference in water levels between one side of the rapids and the other can exceed two metres (6.5 feet). Currents can exceed 25 km/h (15 mph). Big waves are greatest at +XL or +L times and viewed from Roland Point. Whirlpools are greatest at –XL or –L times and viewed from North Point. There is approximately a 20-minute window on either side of the “Best Viewing Time,” so don’t feel you need to be there right at the exact time – it’s a process. The hike to view the rapids is 8 km (round trip) and takes about one hour to walk each way. The well-developed trail has minimal elevation changes, with a few rough sections. Be prepared for darkness if the “Best Viewing Time” is near sunrise or sunset.

## JANUARY 2024

# SKOOKUMCHUCK (Sechelt Rapids) BEST VIEWING TIMES

Skookumchuck means “Strong Water.” Tidewater, forced through Skookumchuck Narrows, forms the Sechelt Rapids. The difference in water levels between one side of the rapids and the other can exceed two metres (6.5 feet). Currents can exceed 25 km/h (15 mph). Big waves are greatest at +XL or +L times and viewed from Roland Point. Whirlpools are greatest at –XL or –L times and viewed from North Point. There is approximately a 20-minute window on either side of the “Best Viewing Time,” so don’t feel you need to be there right at the exact time – it’s a process. The hike to view the rapids is 8 km (round trip) and takes about one hour to walk each way. The well-developed trail has minimal elevation changes, with a few rough sections. Be prepared for darkness if the “Best Viewing Time” is near sunrise or sunset.
